## Landscape Paintings in American Decorative Arts

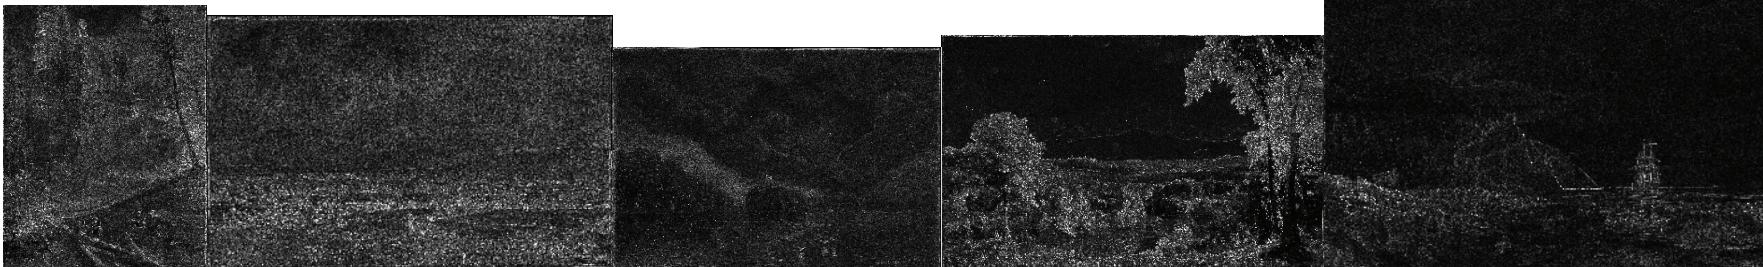

Details:

American landscape paintings include about 28 pieces with available images. Combine into one long panorama, over a timeline using the art's end date. Compare the composition using combined sobel gradients to highlight the contour lines.

Questions:

1. What does the comparison of land to sky look like in this sampling of landscapes - is there a high proportion of one over the other?
2. Does the composition change over time from less land to more land or the opposite?
